

The leading SaaS-based solution that provides reimbursement and utilization reports, analysis and tools for outpatient providers.

Reimbursement PRO gives providers increased control through simplifying the denial management and reconciliation process which, ultimately, reduces the cost of collections. Equipped to work in conjunction with any practice management or billing system, Reimbursement PRO offers much more than standard revenue cycle management solutions. With Reimbursement PRO, you will receive management reports, work flow solutions, on-demand EOBs and benchmarking.

Benchmarking

Compare practice performance against peers, and leverage data with payers

Insight Management Reports

Real-time reports to help identify and fix problematic collections issues

Personalized Practice Homepage

A practice-based homepage allowing flexibility to customize the service to personal needs and preferences

Quick Turn Workflow Tools

Automate the denial management process and provide transparency into denied claims

SaaS-Based System

Secure access to your information from any web browser; no servers needed

System Agnostic

Ready to work with all practice management or billing systems

EOB Cabinet

Quickly and efficiently file, search and retrieve patient specific information; allows instant access to paper and electronic EOBs in one place through RemitDATA's WebScan PRO engine

*Cost-effective,
SaaS-based revenue
cycle management
solution for controlling
and streamlining the
reimbursement process.*
