Delivering Transparency to Providers

It's time for healthcare providers to see what payers, Medicare and regulators already see. With increasing regulations, the ever-changing landscape of reform and declining reimbursements, physicians and practice administrators need clarity now more than ever to be successful.

RemitDATA's TITAN solution is revolutionizing the healthcare industry by bringing an unprecedented level of transparency to physicians and practice executives. Industry experts agree, this solution will completely transform the way physicians get paid, finally providing them with the insight needed to thrive in today's challenging environment.

Our patented reimbursement and utilization analysis and benchmarking technology presents your practice with actionable insight into:

Reimbursement

Take action for fewer exceptions and accelerated cash

Utilization

Reduce risk by comparing code usage and performance

Compliance

Set customized audit risk alerts and outlier recognition

Productivity

Maximize the efficiency of the business office

Benchmarking

Compare real-time reimbursements against local/regional/state peers

Are payers treating me differently from my peers?

How does my denial rate compare to others?

Am I an outlier on key audit triggers?

With the industry's largest provider-focused ERA/ERN and EOB database, TITAN provides practices with the next generation of actionable reimbursement and compliance insight.

Next Generation ERA Database

We leverage industry-leading technologies to create the most powerful and interactive ERA/ERN and EOB database in the industry. Our highly scalable SaaS platform enables rapid access and analysis of huge datasets in seconds for immediate benchmarking performance, as well as utilization and compliance analysis. Each practice can customize the system per user level, so answers to reimbursement, productivity and utilization questions are simple, painless and intuitive.

Insight + Action = Results

Through our customized Insight updates, TITAN delivers vital information on-demand via e-mail or Web portal allowing action to be driven by the appropriate team. Custom Insight alerts can be set for the following:

- Aged cash days
- Denial rate
- Staff productivity
- Audit risks
- Payment cycle times
- Custom measurements

How is my staff performing?

Am I being paid at the same speed as my peers?

How does my code usage compare to state averages?
