

WebScan PRO™

HIPAA-secure, SaaS-based document management solution that minimizes time spent identifying, indexing, filing and retrieving EOBs.

Significantly reduce practice document retrieval time through the use of optical character recognition (OCR)-based technology, which identifies, indexes and files all documents from EOBs to Superbills for immediate online use. Through a powerful, secure and cost-effective system, WebScan PRO allows for improved business processes and increased profitability by minimizing time spent on document management.

HIPAA-Secure

By storing the scanned documents in a state-of-the-art, certified data center, documents are fully HIPAA compliant

SaaS-Based System

Secure access to EOBs from any web browser; no servers needed

User-Friendly

Easy-to-use system, in conjunction with training and tech support for all users

System Agnostic

Ready to work with all practice management or billing systems

Personalized Practice Homepage

Practice-based homepages give the flexibility to customize the service to personal needs and preferences

EOB Cabinet

Quickly and efficiently file, search and retrieve patient-specific information; allows instant access to paper and electronic EOBs in one place; eliminates time required to scroll through a whole batch to find one patient's EOB

Tier 1 Data Center Housed in Former Nuclear Bunker

Secure technology with no interruptions or loss of documents

Identify, index and file documents and EOBs for immediate online use using OCR-based technology.
