- No transaction fees
- No installation fees
- No support fees
- Direct to the payer
- Fast confirmation
- No delays
- Simple
- Easy to use
- Quick installation
- Helpful reports
- Secure
- HIPAA compliant

Your direct connection for healthcare claims

The shortest distance between two points is a straight line – and now you can have a fast link directly to leading payers – including CIGNA™ and UnitedHealthcare™.

Post-N-Track™ is a simple and secure exchange that links providers and payers. Your claims and related transactions (eligibility, status and authorizations) are delivered directly via the Internet, with quick validation and confirmation.

You can also receive claim remittance notices directly from the payer – and schedule transmissions to match your claim processing cycle.

No cost to providers

There are no installation, transaction or support fees with the Post-N-Track solution – the service is free of charge.

Easy to install

You can download the Post-N-Track Doodad™ utility via the Web in less than a minute. Installation is quick and simple, and no interfaces are required to your existing claims or practice management system.

“I am so glad we found Post-N-Track. Our claims are delivered much faster, and we receive immediate notification that our claims have been received. Going direct with Post-N-Track was so easy.”

Kathy Williams
IT Manager
Tarboro Clinic

“The University of Wisconsin Medical Foundation has used Post-N-Track for 3 months now to submit our claims. We've found the tool to be easy to use. Set up was a breeze.

I found this to be one of the quickest transactions we have been able to put in place.”

Gretchen Beicher
Billing Services Manager
UW Medical Foundation

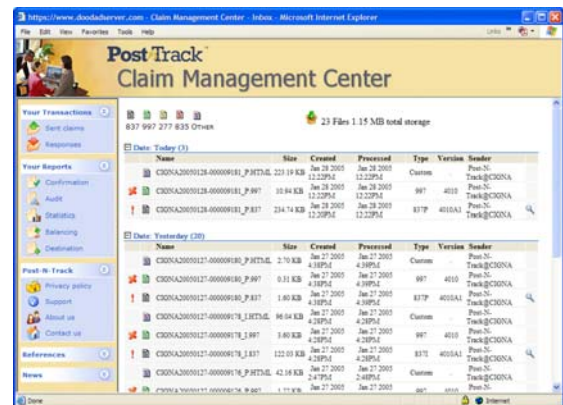

Enroll now: www.post-n-track.com

The setup process takes less than five minutes. You can send your next batch of claims directly to your payers – with no delays.

Claim Management Center included

You can review claims and responses at any time, with the Post-N-Track Claim Management Center™. Every transaction is tracked and logged, similar to a Federal Express™ package. Included free of charge, this reporting system helps you manage claims, rejections and financial totals.

Notices of claim errors (997's) are automatically translated into friendly, easy-to-read reports – with an explanation of the error, to help you quickly fix the problem and resubmit. You can also receive alerts for key problems.

Compatible with other payers

Post-N-Track is not exclusive, and no changes are required to your existing payer relationships. You can continue to send other claims to a Blue Cross™ / Blue Shield™ plan or clearinghouse.

Standard claim files – with reduced error rates

Post-N-Track supports standard ANSI 837 professional, institutional and dental claims, as well as NSF and HCFA “print” images. Post-N-Track also insures that your claim files meet each payer’s specifications, to reduce rejection errors and delays.

Secure Web connection

Your transactions are protected with multiple layers of encryption, validation and authentication. Your data is transmitted via the Internet through the highly secure Post-N-Track channel that links payers to providers. This ensures that data always arrives unaltered and undamaged, from an authorized source.

One desktop or a large network: Post-N-Track is compatible

- Doodad is a small utility that runs on standard desktop PC's with Windows™ 98, 2000, Me and XP, or servers with Windows Server™ 2000 or 2003. You can use any Internet access provider – dial-up or high-speed. No custom interfaces are required. (Note: you are responsible for the cost of Web access.)
- Doodad is compatible with complex networks, routers and firewalls used in larger organizations, and can send files produced on Unix and mainframe systems.
- Post-N-Track also supports standard FTP and S/FTP connections, PGP encryption and third-party data transfer tools, e.g. Cyclone™.
