- Quick installation
  
- Helpful reports
- Secure
- HIPAA compliant

## Your direct connection to CIGNA Dental™

Post-N-Track™ is a simple and secure exchange that will link your office to CIGNA Dental™. Your dental claims are delivered directly via the Internet, with quick confirmation. There are no clearinghouse delays.

## No cost to dentists

The direct Post-N-Track service is offered free of charge to dentists and dental service providers. There are no fees for installation, support or transaction processing.

## Easy to use

The free Doodad™ utility will transmit your claim files to CIGNA Dental via the Internet. It's simple and easy to use, and no training is required. You'll receive an immediate confirmation of delivery to CIGNA Dental. You can schedule transmissions to match to your claim processing cycle.

## Simple to install

Installation is easy – Doodad runs on standard Windows™ PC's or servers. No changes or custom interfaces are required to your practice management system.

## Direct entry option

An alternate solution is also available that will allow you to enter your claims manually, for quick delivery to CIGNA Dental.

## Enroll now: [www.post-n-track.com](http://www.post-n-track.com)

The entire setup process takes less than five minutes. You can send your next batch of claims directly to CIGNA.

“Our providers have been asking for a simple online connection for claims submission. Post-N-Track provides easy Internet access to meet that need, along with HIPAA compliance and security.”

Carlos Ferrera

Vice President of Operations  
Effectiveness and Quality  
CIGNA Dental

## Claim Management Center included

You can review claims and responses at any time, with the Post-N-Track Claim Management Center™. Every transaction is automatically tracked, similar to a Federal Express™ package. Included free of charge, this reporting system helps you manage accepted claims, errors and financial balances.

Claim error notices (997's) are automatically translated into friendly reports – with a clear explanation to help you quickly fix the problem and resubmit. You can also receive alerts for key processing problems.

## Dental claim formats and HIPAA compliance

Standard ANSI 837 dental claim files are supported – as well as NSF files, which are automatically converted to ANSI format for HIPAA compatibility. The Post-N-Track system insures that your claim files meet CIGNA Dental specifications, to help reduce rejection errors. If your facility also creates medical claims, Post-N-Track supports ANSI 837 professional and institutional claims – which are delivered directly to CIGNA HealthCare™.

## One desktop or a large network: Post-N-Track is compatible

- Virtually every dental practice management system is supported – no custom interfaces are required.
- The Doodad™ utility runs on standard desktop PC's with Windows™ 98, 2000, Me and XP, or servers with Windows Server™ 2000 or 2003. You can use any Internet access provider – dial-up or high-speed. (You are responsible for the cost of Web access.)
- Doodad is also compatible with complex networks and firewalls used in larger organizations, and can send files produced on Unix and mainframe systems. Post-N-Track also supports standard FTP and S/FTP connections, PGP encryption and third-party data transfer tools, e.g. Cyclone™.

## Secure connection

Your claims are protected with multiple layers of encryption and authentication. This ensures that data always arrives unaltered from an authorized source – to meet HIPAA security and privacy requirements.
